Joshua Pasacay Palero

Entry-Level Full-Stack Software Developer | PHP, MySQL, React, TypeScript, Node.js
Quezon City, Metro Manila | 0936 807 7249 | joshuapalero111@gmail.com | LinkedIn: Joshua Palero

SUMMARY

Entry-level Full-Stack Software Developer and 2026 BS Information Technology graduate with hands-on experience delivering web and hardware-integrated systems across a project-based software developer role, a 486-hour commercial practicum, and a municipal government project. Gained practical experience analyzing workflows, building responsive web applications, connecting biometric hardware with software systems, and updating legacy PHP/MySQL modules for reliable day-to-day performance.

EXPERIENCE

Software Developer (Project-Based Contract) 2-month contract, 2026

Telford Svc. Phils., Inc.

- Kept the company's locally deployed internal systems running (HTML, CSS, jQuery, MySQL, and older PHP versions) across older runtime environments.
- Tracked down bugs and bottlenecks and fixed them at the source, in the code or the database.
- Cleaned up legacy PHP and jQuery so it is easier to maintain and runs faster and more reliably.
- Built enhancements aimed at problems that kept coming back.

Software Developer Intern Jun – Nov 2025 (486 hrs)

ELI Information Technology Solutions, Valenzuela City

- Covered the whole stack: interfaces, business logic, and the database.
- Fixed the backend and schema problems in the Attendance and Leave Request module using PHP and MySQL.
- Reworked Employee Management so the data is cleaner, the pages perform better, and the module is easier to use.
- Took a half-finished legacy Payroll module and finished it into something ready for production.

CAPSTONE PROJECT

Human Resource Information System (HRIS) Jul 2025 – Mar 2026

Capstone 1 & 2 | Client: City Government of Meycauayan, Bulacan

- Designed and developed a complete HRIS for the City Government of Meycauayan.
- Worked closely with the City HR Management Officer (CHRMO) to understand how the work actually got done, then turned it into backend services.
- Wrote the app in React, TypeScript, and Express, using types to keep it safe to grow.
- Connected a biometric device to the system with Arduino, C#/.NET, and WebSockets so data arrives in real time.
- Designed the MySQL database (Drizzle ORM) with normalized tables and consistent naming.

TECHNICAL SKILLS

Web Development Basic to intermediate	HTML, CSS, JavaScript, jQuery, TypeScript, React, responsive UI design
Backend & Database Basic to intermediate	Node.js, Express, PHP (modern and legacy versions), MySQL, PostgreSQL, ORM, database design
Security	Secure IT operations
Hardware, Desktop & IoT Basic	Arduino, C#, .NET, VBScript, WebSockets, biometric device integration
Tooling & Workflow	Git, GitHub, ESLint, Vite, Zed IDE
IT Support	Troubleshooting, system debugging, legacy codebase resolution, code enhancement

EDUCATION

BS in Information Technology Graduated May 26, 2026

ACLC College of Meycauayan City, Bulacan

- Coursework: web application development (PHP, MySQL, full-stack), system administration, IT troubleshooting.
- Certificate of Internship, IT Practicum (2025), ELI Information Technology Solutions.
